About Pacific Ridge Exploration Ltd.

Pacific Ridge has assembled a portfolio of early-stage gold and base metal projects located in the Yukon, where its board and management team have a track record of success.

The Company's Chairman, Gordon Davis, co-discovered the Anvil Mine, which at one time was the largest operating open-pit lead/zinc mine in the world.

Dr. Gerald Carlson, President and CEO, was the recipient of the J.C. Sproule Award for the advancement of geology and mineral exploration in the Yukon, and Bruce Youngman, director, is a board member of a number of Yukon-focused exploration companies, including Atac Resources Ltd.

Fyre Lake Copper-Gold-Cobalt VMS

The Kona copper-gold-cobalt massive sulphide deposit is a known resource that remains open for expansion at depth and along strike to the north. The deepest holes have intersected 5.6% copper over 3m, 3.2% copper over 5.7m and 6.15 copper over 7m, with high gold credits. Adjacent geophysical targets remain to be drill tested.

BMC Minerals (No.1) Ltd. has the option to acquire a 100% interest in the Fyre Lake Cu-Au-Co massive sulphide deposit. BMC has been granted two options; the first, a one year option whereby, in order to maintain and exercise the option, it must pay the Company \$300,000 on closing and \$2,200,000 one year after closing, or the second, a two year option whereby, in order to maintain and exercise the option, it must pay the Company \$300,000 on closing, \$300,000 one year after closing and \$2,420,000 two years after closing. In addition, BMC has agreed to make a bonus payment of \$1,000,000 if and when BMC's Kudz Ze Kayah property has reached commercial production for one year.
