Forward-Looking Statements

This presentation includes certain statements that may be deemed “forward-looking statements”. All statements in this presentation, other than statements of historical facts, that address exploration drilling, exploitation activities and events or developments that Pacific Ridge Exploration Ltd. expects to occur, are forward-looking statements. Such statements may be identified in this presentation by the use of words such as “plans”, “will”, “expects” and “may” as well as the use of the future or conditional tense. Although Pacific Ridge Exploration Ltd. believes the expectations expressed in such forward-looking statements are based on reasonable assumptions, such statements are not guarantees of future performance and actual results or developments may differ materially from those in the forward-looking statements. Factors that could cause actual results to differ materially from those in forward looking statements include market prices, exploitation and exploration successes, and continued availability of capital and financing and general economic, market or business conditions. Investors are cautioned that any such statements are not guarantees of future performance and actual results or developments may differ materially from those projected in the forward-looking statements.

Pacific Ridge’s disclosure of a technical or scientific nature has been reviewed by Gerald G. Carlson, Ph.D., P.Eng., President & CEO of Pacific Ridge, the Qualified Person under the definition of National Instrument 43-101.

Pacific Ridge projects are well located – similar geology and mineralization style as Coffee, Golden Saddle and QV

Mariposa Project

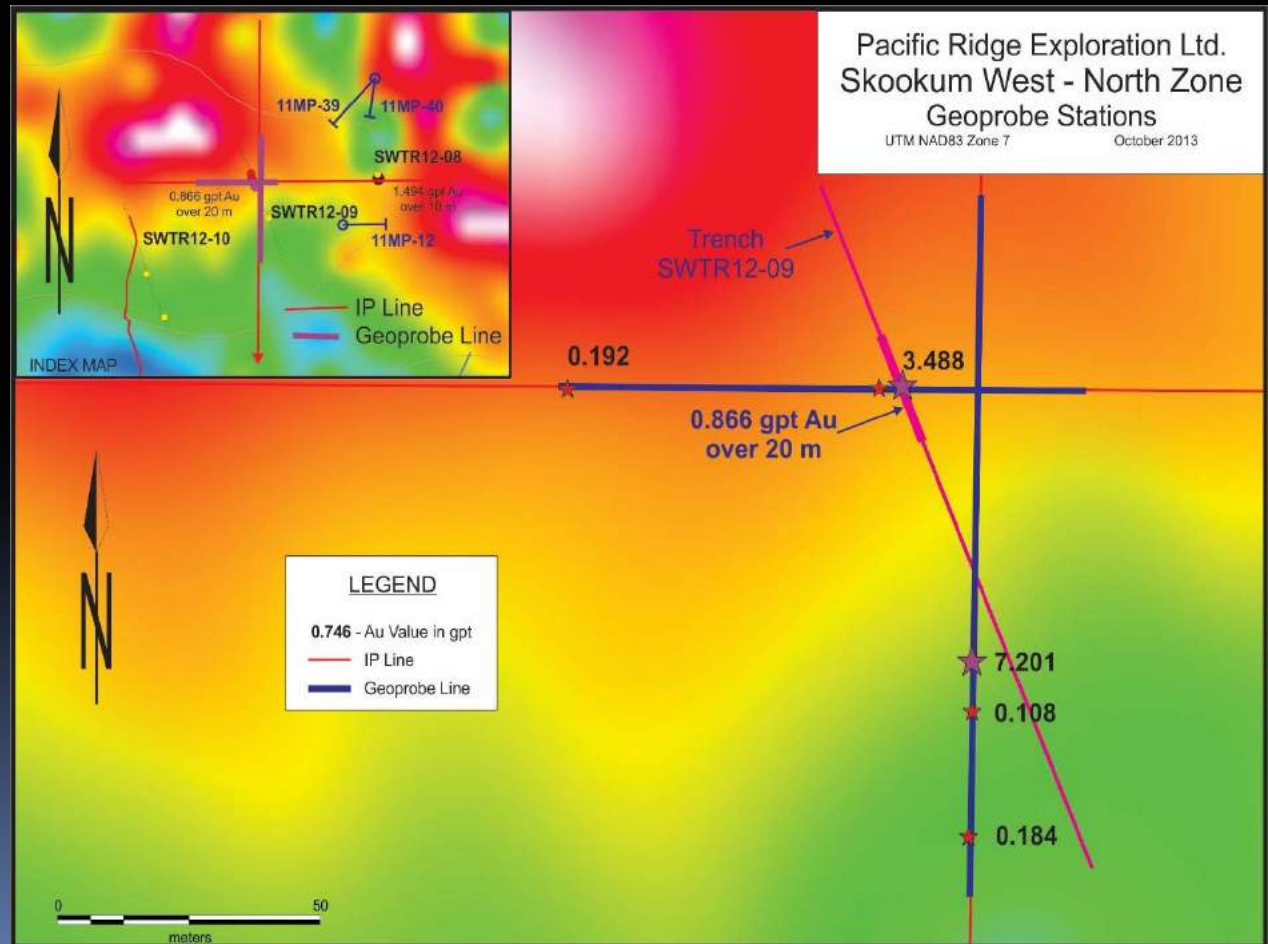

Skookum Main –High Grade Drill Target

- Best drill intersection - 2.74 gpt gold over 33.7 m within an interval of 1.51 gpt gold over 81.5 m; overlying trench ran 1.25 gpt gold over 30 m within 305 m of 0.36 gpt gold.
- Structure (red dashed line, below) not adequately tested along strike.

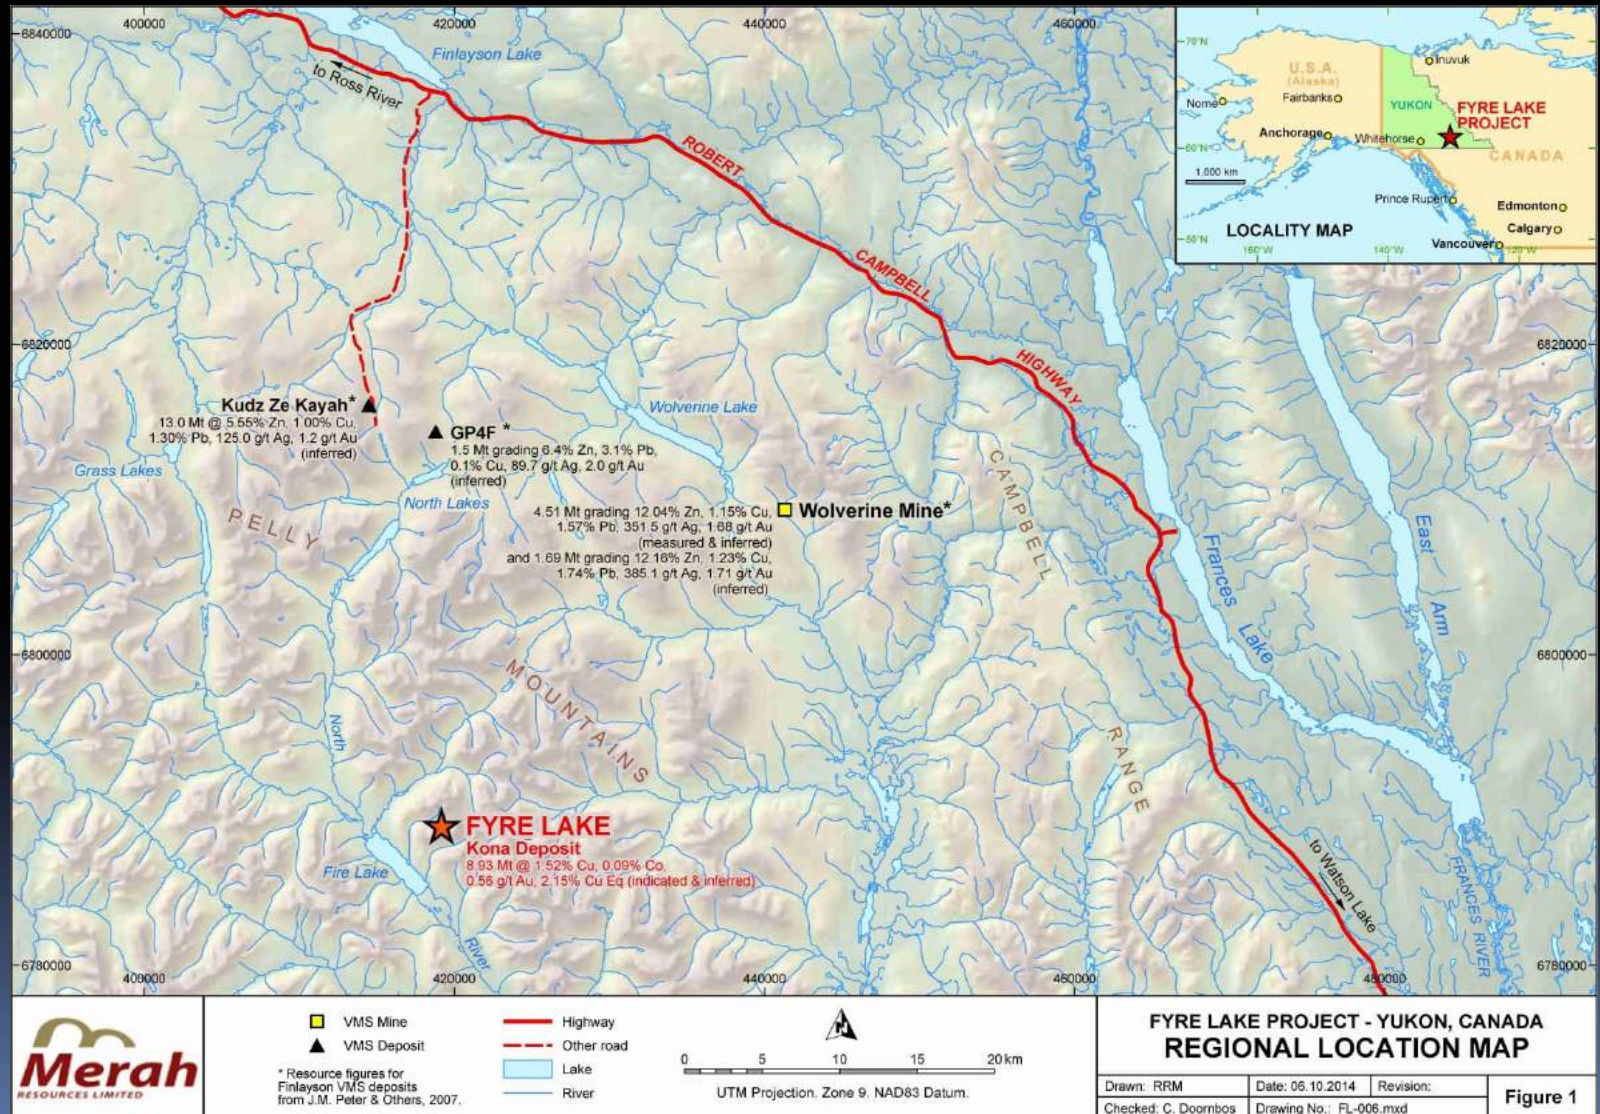

Skookum West – New High Grade Drill Targets

- Undrilled target – 1.5 km west of Skookum Main zone.
- Trenches contain 1.49 gpt gold over 10 m and 0.866 gpt gold over 20 m.
- Geoprobe (deep soil) sampling encountered 3.488 gpt gold and 7.201 gpt gold.

Fyre Lake Project

Fyre Lake Deposit

- The property is 25 km south of BMC's Kudze Kayah deposit, currently the subject of a prefeasibility study.
- The Kona Deposit has been defined by 115 holes totaling over 23,200 metres of diamond drilling.
- NI 43-101 compliant mineral resource estimate for the Kona Deposit reported in 2006 includes:
 - Indicated Resource: 3.571 million tonnes grading 1.57% copper, 0.10% cobalt and 0.61 grams gold per tonne at a 1% copper cut-off grade.
 - Inferred Resource: 5.361 million tonnes grading 1.48% copper, 0.08% cobalt and 0.53 grams gold per tonne. at the same cut-off grade
- Resource estimates prepared by D. Blanchflower, P.Geo., of Minorex Consulting Ltd., who is the qualified person for this purpose.

Pacific Ridge 2015 Investment Highlights

- ✓ Proven Management
 - 45 years of public company mineral discovery and mine-finding experience, well-recognized by the mining and financial community
- ✓ Quality Gold and Base Metal Projects in the Yukon
 - Well located lode gold projects in the Klondike and White Gold Districts with both advanced and grassroots exploration programs
 - Fyre Lake: Drill-defined resource with additional exploration potential in eastern Yukon's Finlayson District
- ✓ New Project Generation
 - Additional mineral property acquisitions currently under consideration
